

# MailLink

Hosted E-Mail Service

## It's Your Very Own, Fully Hosted, Fully Managed Exchange E-Mail Service.

### MailLINK Gives You Reliable E-Mail Without the Hassle of Owning or Maintaining a Server.

E-Mail has become just like any other utility. When you're ready to use it, you expect it to work. Just like when you turn on a faucet, you expect a stream of water, you expect your e-mail to be working every time you need it. Fully hosted e-mail systems eliminate the up-front costs and ongoing headaches of managing your own e-mail server. And that's good news because if you're like most organizations, you probably have enough priorities without adding troubleshooting your e-mail system to the top of the list.

### Economical, Even with All the Functionality You Demand.

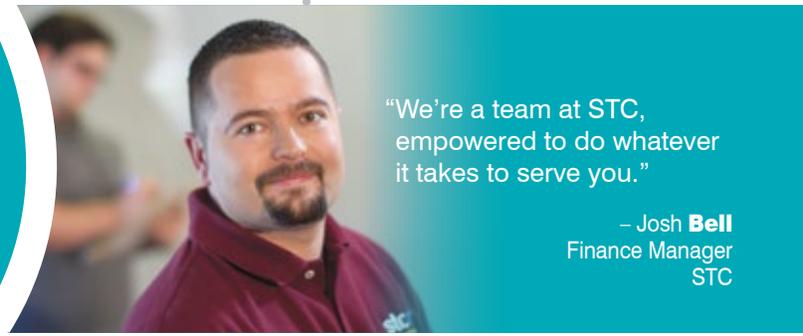

Operating an e-mail server internally is quickly becoming a thing of the past. They are costly to purchase, expensive to scale, time-consuming to manage and highly unreliable. Who needs that? Particularly when there is MailLINK. Our hosted Exchange service provides you an affordable monthly fee with features that include: e-mail and calendar sharing through Outlook, smartphone and web browser support. You also can opt for the famed intranet-ready SharePoint.

### Compatible with Just About Any System.

No matter your network, even if you are currently using older versions of Exchange or you're POP e-mail users, MailLINK will show you why upgrading the easy way makes sense. Not only will you get the important standard features, but you can also take advantage of custom features like hosted Blackberry® services and ActiveSync for Windows mobile devices. You'll be able to access your e-mail from anywhere no matter what devices your organization and employees use.

### A Strong Track Record of 99.99% Reliability.

It's pretty universal. People can get a little ugly when their e-mail goes down. That usually sends one or more team members into a mission-critical panic. With MailLINK, that all goes away—the anger and the panic and the frustration. STC's 99.99% reliability makes business-as-usual more productive, more positive.

"We're a team at STC, empowered to do whatever it takes to serve you."

– Josh **Bell**  
Finance Manager  
STC

### MailLINK is Secure and Compliant, of Course.

MailLINK is backed by an SAS 70 Type II audited location. We hold the auditing statement issued by the Auditing Standards Board of the American Institute of Certified Public Accountants. (AICPA).

"STC has made my life easier. I know real people are at the ready if I ever have a problem. Of course, with 99.99% uptime, our mail server has never been down."

– **Jason**  
IT Administrator  
Glendale, Arizona

## Real People Means a Real Partner.

When it's time to tackle your organization's networking needs, then it's time to look at the companies that can provide that service. Price, technology and expertise are all considerations, but ask yourself which company will be a true partner? Which company stands ready with real people, not auto attendants and wait times? Which company proactively stops problems from happening? Which company guarantees 99.99% uptime, and delivers it? Which company is going to make your life easy, make your boss happy and keep your organization up and running? When you ask yourself those questions, the answer is simple. You work with STC.

STC is a telecommunications company that, since 1999, has been helping schools, government agencies, cities, towns and businesses communicate using voice, data and video. We do it by designing, installing and managing broadband wireless systems and hosted services. While we take pride in our technical achievements, the thing that we're most proud of is our personal service. We know our clients, and they know us. We keep it to that level and that's what keeps what we do real... and reliable, 99.99% reliable.
