

Think You Can't Afford VoIP Technology? Think Again.

VoipLINK® Gives You The Telephone System You Want with the Service, Support and Price You Need.

Why buy technology when you don't have to? Especially technology that is continually improving. Keep your cash, eliminate the large capital expense and, instead, choose VoipLINK. It's the simple and elegant, fully managed VoIP phone system that requires no investment, just a per-seat monthly subscription. If you believe that cash is king, and you know about VoipLINK, you'll probably never buy a phone system again.

You'll Love VoipLINK's Flexibility, Too.

VoipLINK is not a one-size-fits-all service solution. That's not how STC operates; we're listeners at heart. So every system we design and install is customized to work the way you work, and every organization is different. With VoipLINK, you tell us your needs and priorities, and together we'll choose the right system size and functionality.

Focus on Your Core Business, Not Your Phone System.

You have work to do, so the last thing you need to worry about is your phone system. Put your IT and capital resources to better use with VoipLINK. Through this fully hosted, managed and monitored system, at last you'll be free to focus on what's important. That means no more dealing with software upgrades, no more troubleshooting, no more maintenance. STC has you covered.

Get All the Benefit Without All the Cost.

Sure you may realize the value of VoIP technology, but can you handle the maintenance and the cost? Now you can eliminate that question entirely. In fact not only do you stop worrying about it, you stop thinking about it. With VoipLINK, you get a managed and hosted system, fixed predicted monthly rates, easier budget planning and an overall reduced total cost of ownership.

 **Free basic handsets with a signed 60-month contract.**

Just In Case You Still Aren't Convinced.

VoipLINK includes advanced IP phone system features, full configuration management, handsets and a real live help desk with real people and remote 24/7/365 all-the-time-monitoring. You even get unlimited moves, adds and changes along with advanced unified communications mobility.

“What I love about working at STC is there's no red tape between your needs and our solution.”

Inside Sales Representative
STC

When You Choose VoipLINK, You Gain Function and Flexibility.

Unified Communications

- Intelligent call routing based on caller, time and other variables
- Outlook integration for dialing, contacts management and voice-mail
- Fully-featured soft phone
- Drag and drop call routing and transfers
- Auto-attendant
- Presence and Instant Messaging (IM)
- Audio and web conferencing
- Video calling
- Automatic call distribution (ACD)
- PSTN failover
- Ethernet port failover
- Power failover

Mobile Communications

- One enterprise number, one enterprise voice-mail
- All features extended to mobile device
- Location- and context-aware enterprise presence
- Secure remote voice

Emergency Notifications

- Generates audible and detailed desktop alerts and phone calls when a first-level (code red) or second-level (code blue) emergency call is detected
- Supports site-specific alerting for geographically dispersed organizations
- Supports multiple external emergency numbers
- Alerts include name and extension as well as site and physical location of the party who called the code blue or emergency number
- Allows key personnel to reliably communicate in real-time
- Creates an integrated log of code blue and emergency call-related activities, going beyond standard 911 and other emergency compliance to provide an enhanced solution

Other Features

You get many features standard, and can choose others you want from a long list of worthwhile options.

Real People Means a Real Partner.

When it's time to upgrade your organization's telephony systems, then it's time to look beyond price and features and consider uptime, reliability, maintenance, flexibility, scalability and ongoing support. It's also critical to know who will be there when you call. An automated attendant or a real person who can assist you? Ask yourself which company will be a true partner. Which company stands ready with real people, not auto attendants and wait times? Which company proactively stops problems from happening? Which company is going to make your life easy, make your boss happy and keep your organization up and running? When you ask yourself those questions, the answer is simple. You work with STC.

STC is a telecommunications company that, since 1999, has been helping schools, government agencies, cities, towns and businesses communicate using voice, data and video. We do it by designing, installing and managing broadband wireless systems and hosted services. While we take pride in our technical achievements, the thing that we're most proud of is our personal service. We know our clients, and they know us. We keep it to that level and that's what keeps what we do real... and reliable, 99.99% reliable.
